

GS Yuasa Lithium Power and GS Battery Inc. Announce Office Relocation

ROSWELL, Ga., Jan. 12

GS Yuasa Lithium Power and GS Battery (USA) Inc. are pleased to announce their office relocation to a combined 40,000 sq. ft facility located in the Northmeadow Business Park, Roswell, Georgia. The move was done to accommodate recent growth and to help the company's visibility in the local area. The new facility will include additional space for product testing, design engineering, light manufacturing and warehousing.

William Moll, President, GS Yuasa Lithium Power, said, "This move positions GS Yuasa to further expand into the lithium battery market by supporting our current and future customers with dedicated design, testing and assembly operations. " We are excited about our growth opportunities and about locating in Roswell."

Yasuyuki Nakamura, President of GS Battery (USA) Inc. said, "We believe this new facility will improve our company efficiencies and provide our employees with a larger, more comfortable work environment that will further enhance our customer service and support."

Jay Northey, General Manager, GS Battery (USA) Inc. and Board Member for both companies said, "The relocation and expansion is attributed to our entire team that has worked so hard to achieve our current growth." " He went on to say, "The City of Roswell was very open to our needs and we are pleased to be able to offer our service and support to both Roswell and Fulton County."

GS Yuasa Lithium Power is a subsidiary of GS Yuasa Power Supply, Ltd. of Japan, and creates complete battery systems for North American clients within the Military, Aviation, Space, HEV, EV, and Undersea industries. " As a complete power solutions provider, GS Yuasa Lithium Power can provide everything from cells to complete battery systems. " Our portfolio includes Lithium Ion cells optimized for energy and/or power, with capacities ranging from 4Ah to 400Ah. " The GYLP battery systems include smart battery monitoring and protection circuitry, cell balancing, and options for charging.
